DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-3 are apparatus claims yet the limitations contained therein are method steps, "a reservation administration device... accepts the usage reservation using the time....", thus, it is unclear and indefinite as to which type of claim is intended.

Note: For examiner purposes, it will be assumed that all apparatuses are "configured to" perform the method steps.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

Art Unit: 3629

2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over US PAT 6,850,153 to Murakami et al. (Murakami).

As to claim 1, Murakami discloses an apparatus for reservation of a shared vehicle (title), with a reservation confirming device (fig 2, 36,56), a vehicle availability detector (28, fig 2), a reservation device accepts the usage reservation (56), the system would be able to start the reservation at any time.

As to claim 2, Murakami discloses a buffer time (58).

As to claim 3, the system could be used if the person is early for a reservation.
